New York Report

Introduction

The National Association of REALTORS® has released reports on who members are and the business they are conducting dating back more than five decades. Each year the report is released in varying and unique circumstances. While the report provides timelines of how experiences and transactions have changed, it is also important to remember it is a snapshot of that period of time. This year's *2021 Member Profile* covers a period in which COVID-19 was widespread throughout the United States and world.

This time period was also an incredibly unique time for real estate. As COVID-19 lockdowns emerged in the Spring of 2020, home sales dropped. Quickly real estate was deemed an essential service in nearly every state. The 30-year fixed interest rate for mortgages was just 3.1 percent. The interest rate, coupled with the change in remote work patterns, drove home sales to 14-year highs. However, while buyer demand remained strong, inventory dropped to near 40-year lows. Members embraced technology as a way of doing business during COVID-19 and lived up to their dynamic nature.

In 2020, the rise in new members of the National Association of REALTORS® continued to increase. Membership grew from 1.40 million at the end of 2019 to 1.48 million at the end of 2020. The median years of experience in real estate decreased to eight years from nine in last year's report. Those with two years or less experience increased to 26 percent from 24 percent, while those with 25 years or more experience decreased to 15 percent from 17 percent. Despite the churn and unique real estate market conditions, looking forward, 79 percent of REALTORS® are very certain they will remain in the market for two more years.

Limited inventory continues to plague many housing markets in the U.S. Sixty percent of members who practice as brokerage specialists cited the lack of housing inventory was holding back clients from completing a transaction. Impacted by limited inventory, the typical number of transactions was 10 in 2020, a decrease from the previous year of 12. With the decline in the number of transaction sides, the median sales volume decreased from \$2.3 million to \$2.1 million in 2020.

The median gross income of REALTORS® declined to \$43,300 in 2020 from \$49,700 in 2019. New members entering the field can be noted by the differences in income by experience, function, and hours worked per week. Fifty-nine percent of members who have two years or less experience made less than \$10,000 in 2020 compared to 39 percent of members with more than 16 years of experience who made more than \$100,000 in the same time period. REALTORS® with 16 years or more experience had a median gross income of \$75,000—compared to REALTORS® with 2 years or less experience that had a median gross income of \$8,500.

The typical member was an independent contractor affiliated with an independent company catering to local markets. REALTORS® frequently have had careers in other fields prior to real estate, the most common being in management, business, and financial professions, followed by sales and retail. Only five percent indicated that real estate is their first career. The majority of members were women homeowners with a college education. The share of women in the industry continues to rise and is now at 65 percent—up from 57 percent in 2010. The median age of REALTORS® was 54 in the 2021 survey.

As COVID-19 has shown, technology can bridge the gap when in-person contact was limited and social distancing was essential. While there are older technologies that are embraced on a daily basis such as e-mail, social media, and GPS there are also new emerging technologies such as Photofy and the use of drones. The majority of members have their own website where they promote their own property listings, but many also post information about the buying and selling process to help consumers who may just be in the research part of the process.

2021 Member Profile

New York Report

Highlights

Methodology

In March 2021, NAR e-mailed a 93-question survey to a random sample of 161,155 REALTORS®. Using this method, a total of 10,643 responses were received. The survey had an adjusted response rate of 6.6 percent. The confidence interval at a 95 percent level of confidence is +/- 0.95 percent based on a population of 1.4 million members. In New York a random sample of 9,984 members were sent the survey, 304 members took the survey. New York had a response rate of 3.0 percent.

Survey responses were weighted to be representative of state level NAR membership. Information about compensation, earnings, sales volume and number of transactions is characteristics of calendar year 2020, while all other data are representative of member characteristics in early 2021.

The NATIONAL ASSOCIATION OF REALTORS® is committed to equal opportunity in the real estate industry. In accordance with this commitment, racial and ethnic information was collected and is included in this report.

Where relevant, REALTOR® information in subgroups based on the license held by members of NAR: a broker, broker-associate or sales agent license. The term “broker” refers to REALTORS® holding a broker or broker associate license unless otherwise noted. In some cases, information is presented by REALTORS®’ main function within their firm or their real estate specialty regardless of the type of license held.

The primary measure of central tendency used throughout this report is the median, the middle point in the distribution of responses to a particular question or, equivalently, the point at which half of the responses are above and below a particular value. Data may not be comparable to previous *Member Profile* publications due to changes in questionnaire design.
