

# Monthly Indicators

## December 2024

U.S. existing-home sales improved for the second consecutive month, rising 4.8% to a seasonally adjusted annual rate of 4.15 million units, an eight-month high, according to the National Association of REALTORS® (NAR). Sales were up 6.1% compared to the same time last year, marking the largest year-over-year increase since June 2021. Economists had forecast existing-home sales would come in at an annual rate of 4.07 million units for the month.

New Listings were up 3.9 percent to 5,968. Pending Sales increased 3.5 percent to 6,423. Inventory shrank 2.6 percent to 23,198 units.

Prices moved higher as the Median Sales Price was up 10.5 percent to \$420,000. Days on Market decreased 2.0 percent to 49 days. Months Supply of Inventory was down 3.7 percent to 2.6 months.

Total housing inventory stood at 1.33 million units heading into December, a 2.9% decrease from the previous month but a 17.7% increase year-over-year, for a 3.8-month supply at the current sales pace. Inventory remains below the 5 – 6 months’ supply of a balanced market, and the limited number of homes for sale continues to put upward pressure on sales prices nationwide, with NAR reporting a median existing-home price of \$406,100, a 4.7% increase from one year earlier.

\* Average Pct. of List Price Received for all properties from January 2024 through December 2024. This is not the average of the individual figures above.

## Historical Percent of List Price Received by Month

# Housing Affordability Index

This index measures housing affordability for the region. For example, an index of 120 means the median household income is 120% of what is necessary to qualify for the median-priced home under prevailing interest rates. A higher number means greater affordability.

## December

## Year to Date

Affordability Index		Prior Year	Percent Change
